# Pediatric Nursing: Content Review PLUS Practice Questions (Davis's Success Plus)

## Synopsis

Content review • Case studies • NCLEX-style Q&A This volume in the Content Review Plus Practice Series polishes your knowledge of pediatric nursing while sharpening your critical thinking and test-taking skills. Each chapter offers a concise, yet comprehensive review of the topic, followed by NCLEX-style questions in both multiple-choice and alternate-item formats. Rationales for both correct and incorrect answers, as well as test-taking tips, explain how to apply critical thinking to the question types • great preparation for classroom exams and the NCLEX-RN® Exam. A unique, visual approach with succinct, bulleted outlines, charts, and illustrations helps you build a solid foundation. From normal growth and development, care of the hospitalized child, and medication administration to coverage of the pathology and nursing and medical management of the full-range of pediatric diseases and disorders • easy-to-follow outlines in every chapter review exactly what you need to know. Choose from 600 total questions in the text and on DavisPlus to enhance your skills. Bring your text to life with DavisPlus online content! A Plus code in the front of each new book unlocks DavisPlus • instructor and student resources. All 450 questions from the book plus 150 unique to DavisPlus, give you even more practice. (Access can also be purchased at [DavisPlus.FADavis.com](http://DavisPlus.FADavis.com).) • “This book is amazing. It fills in the gaps of what the textbooks don’t teach and makes it much more understandable.” • Linda Dicken, Student at University of Maryland “I have used this book for 90% of my studying in my pediatrics semester.” | “This is the semester in our nursing program where the most people fail and I’m currently sitting at an A with one exam left to go.” • Reviewer “Excellent” • “I studied this book for my pediatric rotation and it helped me score high on my exams” • “I barely had to touch my textbook. Highly recommend!” • Reviewer • Awarded first place in the 2015 AJN Book of the Year Award • in the Child Health category

## Customer Reviews

A very good content review! The most essential facts you will ever need from a trusting series. I also own two other books from this series and they are worth every penny. Excellent breakdown of the most important facts on developmental milestones from the new born to the adolescent. Very pleased with this book as I will be able to do my pedi packet assignment entirely based on this one source! My school did not recommend this book and instead had me purchase a Peds textbook that introduces the newborn chapter on page 549! while this review goes straight to the juicy facts from page one in a systematic, easy to follow fashion and a language that is easy to understand. The definitions of the most important concepts at the beginning of each chapter are a plus as well. The Nclex questions at the end of the chapter reinforce the key concepts: i wish there were more of them. However it is the review of the key concepts why i bought the book because this review rocks. For Nclex questions i purchased two other separate books from the Success series. And yes there is an answer key at the end of this book as well unlike in my Peds textbook required by the Nursing Program which came without the answers to the questions at the end of the chapter!

Excellent book! I studied this book for my pediatric rotation and it helped me score high on my exams! I barely had to touch my textbook. Highly recommend!!

The book is very helpful. It gives you the important stuff to know and the questions are great practice.

Wish the institution would recommend this on our reading lists for RN school

Every chapter gives a thorough discussion of the topic

Excellent resource to get to the meat and potatoes of pediatric nursing.

I have used this book for 90% of my studying in my pediatrics semester. I have only opened my actual textbook once and have only had to refer to another source for one or two conditions that were not included in this book. This is the semester in our nursing program where the most people fail and I'm currently sitting at an A with one exam left to go.

It's not very informative at all. It is just like reading all the Chapter reviews in the Peds text book. Not recommended.
