Each subject is stripped to its absolute essence. Only a panel of top nautical experts could pack such a wealth of information into such a small book. Equally valuable for home study and onboard reference, The Instant Handbook includes all the essentials and not a word more.

John Rousmaniere is the author of The Annapolis Book of Seamanship and a dozen other nautical books. Bob Sweet, author of GPS for Mariners and The Weekend Navigator, is the national education coordinator for the United States Power Squadrons. Charlie Wing is the author of Get Your Captain's License and other boating books. Nigel Calder, author of Boatowner's Mechanical Electrical Manual, among other titles, is acknowledged as the world's foremost writer on technical boating topics. Bill Gladstone is the director of education for North Sails and has been teaching sailing for more than 30 years. Richard Clinchy, an emergency medical technician for more than 40 years, is a paramedic, a member of the National Association of EMS Physicians, and past chief of the U. S. Coast Guard Auxiliary's Department of Education. Peter Nielsen is the editor of SAIL magazine and the author of Sailpower.

This book is a selection of some tips written from many authors and it fits not good together. It is like somebody had torn out some articles from sailor magazines put it together to a book, sorry this I do not like so much. In the kindle edition, it has no content description, why? So it is hardly to find the chapters. The chapters their self are quite useful, some are very good....

This is like a stripped-down version of the Chapman's bible. I bought it because it was available for Kindle, but then ended-up buying the Chapman Seamanship version because of how much was lacking (rules of the road, horn communication, lighting requirements...)

Gave as a gift, they used it. Said it was handy.

Great concise must-know principles, can be used as a quick reference or as a starting point for more in-depth learning!

A quick handy reference for any boat.

Great brief overview. Good for novices and good to refresh knowledge

I teach on-the-water to beginning boaters. This is a gift to them. Very complete. great authors. fits in the dash box on boats as a ready reference.

excellent
