First Earth Encyclopedia (DK First Reference)

Synopsis

Covering the essential curriculum areas of human geography, physical geography, geology, and ecology, First Earth Encyclopedia is a comprehensive introduction to the world around us. The engaging style of DK's First Reference series is applied to such topics as where and how people live, how to use maps, weather, world environments, and the changing climate â" inspiring younger readers to think about their own place in the world. With superb artwork, straightforward text, buttons, and quizzes, First Earth Encyclopedia makes our world simple to understand.

Age Range: 5 - 9 years

Grade Level: Kindergarten - 4

Customer Reviews

My husband and I fell in love with DK (especially the Smithsonian line) during a trip to the Smithsonian museums and wanted to start a collection of books for our daughter. The books are filled with an immense amount of information which is presented in a fascinating, readable way. Of course the author couldn't include absolutely every single detail about the subject at hand, but they still did a wonderful job. The photos are gorgeous and a perfect complement to the information being presented. The books themselves have sturdy binding and stout construction.

We got this book for my sons fourth birthday and he is so fascinated by it. He asks to read it every time we go into his room and it has been his bedtime book for about 2 weeks now. He especially loves the sections on the layers of the earth, soil, and oceans. He is very interested in what lives at the deepest depths of the ocean. A great book for getting conversations started and finding out what really interests a kid so you can delve a little deeper on the internet. The more you as a parent know, the more you can supplement what is presented in the book. Very glad we bought this as it is well loved by the little guy and fun to read and explain it all to him. Pictures are also beautiful.

Although he can't read this completely on his own, my son absolutely loves this book. When I read to him at night, he doesn't want story books, he wants this book, or any other of the "First" DK series books that we have. The pictures are great and the amount of information is just right; not too little and not too much. I like that there are real photos and not just illustrations. Great way to get the little ones interested in geography.

I bought this book for my six year old grandson. He is very interested in sciences and he reads at a high grade level. He loves the book and we enjoy reading it together.

The picture color is amazing with lots and lots of information. My 8 yr old daughter LOVES it! We also bought the First Nature Encyclopedia and she loves it equally!

My six year old can not put this down.

My son likes it. Nice book .

Good for kids
