# National Geographic Kids Look And Learn: Count! (National Geographic Little Kids Look And Learn)

## Synopsis

Kids never get tired of counting and neither does National Geographic Little Kids. Introducing National Geographic Little Kids Look & Learn: Count! This first installment in the series of Look & Learn will keep kids engaged for hours. Using gorgeous animal photography, children will learn number recognition through observational learning in isolation and in context—an important early learning concept. Each animal appears isolated on the page and associated with a number, and on the following page, the same number of animals appear in their natural environment. Parents will love watching their kids grow and learn with this fun new companion that is the perfect size for little hands to take everywhere.

## Customer Reviews

NATIONAL GEOGRAPHIC KIDS inspires young adventurers to explore the world through award-winning magazines, books, website, apps, games, toys, television series and events and is the only kids brand with a world-class scientific organization at its core.

This exciting and riveting tale takes you through the ups and downs of numbers and the challenges

they face. Purdy pictures too.

My 20 month old son loves this book. Very bright colors and different animals than in your typical board books. The only thing is I wished it would have done pages for 1-10. It does pictures for 1-5 and then the last 2 pages does 1-10 with small pictures.

I wish it would count to higher than 5. The pictures are great and keep the kids interested but only for so long because it only goes to 5. The last 2 pages go to 10 but not the same way they get to 5

a bit simple on counting, great pictures, I just expected more on teaching than what it gives in the book

Count! My grandson likes this small version of the NGLK books the best. He thinks it's about frogs though, not numbers. We still have some learning to do. :) I highly recommend all of the National Geographic Little Kids First Big and little Books.

Wonderful book any child would enjoy. Purchased for a literacy program administered through the Methodist church in SC. Shipped promptly, arrived carefully packed. Great value.

My friend's kid loves this book. I bought a bunch of this series for Christmas presents and the kids were super happy. Pages are thick and easy to turn and handle, bright bold coloring and awesome pictures.

Maybe it's just her age, but she loves this book! I bought this one, and two others by National Geographic and I think they were her favorite Christmas gifts! We read them over and over!
