Education & Reference > Science Studies > Chemistry #833 in Books > Children's Books >

Science, Nature & How It Works

Age Range: 8 - 12 years

Grade Level: 3 - 7

Customer Reviews

...a mini museum between the covers of a book. [Eyewitness series] -- The New York Times
These books' striking visual impact will draw in even the most casual readers. [Eyewitness series] --
School Library Journal --This text refers to an out of print or unavailable edition of this title.

I homeschool my 5 kids, ages 3-13 and this books has something for all of us. DK books are so engaging and visually stimulating that the kids will just open them and spend an hour just reading. I used DK books when I taught Kindergarten and now that I homeschool, I'm collecting them a little at a time. LOVE this book!

I just love the dk eyewitness books. The photos are eye-catching and colorful and the text is broken into bite sized bits. I am using this book for homeschool as our guiding textbook for our first dip into chemistry. We get a little help from Janice van cleave and Max Axiom too. My son is 7 and is at about a second grade level. He's probably not as impressed as I am. Probably because he didn't

have MY chemistry book to compare to, lol. Anyway, its great for an introduction to some important ideas.

I don't know what I was thinking when I bought this book. I must not have read the descriptions because I got it for my 4 year old daughter and when it arrived I almost immediately sent it back. My first impression was that there was a lot of information in this book and almost all of the topics seemed to me to be over her head. Boy was I wrong, once my daughter saw the book she was HOOKED. This has become her favorite bedtime story. There are so many bright beautiful pictures and the descriptions/writing is very clear and effective. Each page is packed with information and covers the subtopic very thoroughly. Unlike most of the books we own, we can't read this all in one sitting so we pick a few pages at a time. My daughter is constantly asking questions about all the amazing photo's. And I find myself learning things and really feeling engaged in reading (unlike all our princess books we have read eight million times). I believe my daughter enjoys this book so much partially because it comes across as grown up material and isn't 'kiddified' but the pictures do allow her to see and understand the material in her own terms/style. I am eager to buy more books from this line to see if they all are able to create such a love of learning.

good for grandchild

This is a great all-in-one starter book for someone who wants to understand more about chemistry. My son expressed an interest in learning more about chemistry and I struggled with where to start without boring him to tears and squashing his interest. This book was perfect and he loves it. A very well layed out book loaded with great content.

Wish this books was as large at the Smithsonian collection dk puts out, but none the less it is an excellent book for our 8 year old interested in all things science! Great information for all ages, I've learned equally as much as my son!

As in all of the DK collections, this book is another positive addition to my grandson's interest in Chemistry. It is easy to read, the pictures are great and it gives lots of insight to the subject of chemistry.

Content is of interest to all ages. Easy to read with fun facts and intriguing illustrations. It does not

reveal any experiments or activities though. The chapters are nicely arranged by topic.
