Think With Socrates: An Introduction To Critical Thinking

Synopsis

Brief yet comprehensive, *Think with Socrates: An Introduction to Critical Thinking* uses the methods, ideas, and life of Socrates as a model for critical thinking. It offers a more philosophical, historical, and accessible introduction than longer textbooks while still addressing all of the key topics in logic and argumentation. Applying critical thinking to the Internet, mass media, advertising, personal experience, expert authority, the evaluation of sources, writing argumentative essays, and forming a worldview, *Think with Socrates* resonates with today's students and teaches them how to apply critical thinking in the real world. At the same time, it covers the ancient intellectual roots and history of the field, placing critical thinking in its larger context to help students appreciate its perennial value. Author Paul Herrick incorporates original sources from newspapers, a variety of media, and philosophical writing, along with engaging "interludes" featuring selections from Plato's dialogues. A Companion Website at www.oup.com/us/herrick offers resources for students and instructors.

Average Customer Review: 3.3 out of 5 stars 5 customer reviews

Best Sellers Rank: #59,647 in Books (See Top 100 in Books) #47 in Books > Textbooks > Humanities > Philosophy > Logic #76 in Books > Politics & Social Sciences > Philosophy > Logic & Language

Customer Reviews

"For a critical thinking course, I would adopt this book in a heartbeat. I would also consider using it as a supplemental text in Introduction to Philosophy. The basic idea of teaching critical thinking as illustrated in the Socratic dialogues is excellent. Herrick writes in a lucid, entertaining, accessible style that will hold students' attention."--Andrew V. Jeffery, Green River Community College and Pierce College "It's the framing of the critical thinking course as a philosophy course that attracts me to *Think with Socrates*--a critical thinking book that gets back to doing philosophy."--Ed Pluth, California State University, Chico "Awesome. I cannot wait until the book is published."--Beverly J.

Whelton, Wheeling Jesuit University k Yes "It's remarkably clever to use Socrates in this way, especially with the full text of the Euthyphro in the middle."--Russell DiSilvestro, California State University, Sacramento

Paul Herrick received his PhD in philosophy from the University of Washington. Since 1983 he has taught philosophy at Shoreline Community College. He is the author of two previous books published by Oxford University Press: *Introduction to Logic* (2012) and *The Many Worlds of Logic*, Second Edition (1999).

The writer is a former philosophy instructor of mine. The love Paul Herrick has for the socratic method and Socrates in general is infectious. This book is funny and a great need in philosophy.

I really love this book for basic logic. It articulates so many of the issues I recognize in others' arguments. Well written.

way too expensive for a book

This book provides an excellent introduction to critical thinking. What the reviewer said about Herrick's views on climate change, evolution, and God are irrelevant, as these issues are not discussed in this book. For those interested see Robert Almeder's book *Global Warming*. He disagrees with the studies that show global warming. As for God and evolution, Alfred Wallace Russell, the co-discoverer of natural selection thought that evolution was guided by God. The notion of a trinitarian god is debated.Doc

I happen to know the author. He denies the scientific consensus on global climate change and has doubts about biological evolution. He is also argues not only for the existence of the christian god, but that that god must be trinitarian. I would think twice about buying a book of his on "critical thinking."
