Customer Reviews

Brenda Flynn is a freelance writer and artist who lives in Ormond Beach, Florida. She has always had a passion for rocks and stones, and she studied with many artisans from the Dry Stone Conservancy in Kentucky, learning to rebuild dry stone walls from the Civil War era along the beautiful countryside of Kentucky, where she lived for six years. Flynn has worked in masonry and brick, building many outdoor projects, such as barbecues, patios, fences, and walls.

Good book on stone work good price fast delivery good reading too

Lack of detail, lack of photographs and a lack of illustrations. Not all techniques (slip forming) covered. A sincere effort, easy to read but in total not enough information for the beginner.

A lot of information given in a very straight forward manner. Many creative ideas and solutions for specific problems presented here. This book is a keeper.

Lots and lots of text with very few examples of what techniques are being described. Save your money and go to the library for a good reference book on this subject. I returned this book for a full refund.

I was disappointed in this book. I had hoped for more than a list of items needed for work with rock and some info on tools. The pictures, in shades of grey were not helpful at all. I was thinking this would be helpful in designing or at least working with actual types of rock.

Just a bunch of references without any actual instruction or technique.
