Learn Math And Have Fun: Activity Book For Preschoolers

Synopsis

A perfect introduction to funny games for young children (of 4 years+). It is an ideal book to prepare them for school and complements their work at kindergarten. Children learn to count from 1 to 10, and read and write while playing. There are wonderful colored pictures on every page; children are invited to spot the differences, put together, circle around, count, add, subtract, observe, color after breaking the color code, write following a pattern, etc.

Customer Reviews

Teora is a children's books publisher.

A superbly organized and presented activity book for preschoolers, *Learn Math And Have Fun* provides a wealth of clever and varied games, puzzles, and challenges that will keep young children happily occupied for hours with the additional benefit of learning and practicing math concepts while having fun. Enhanced with colored pictures on every page, children four and up are invited to spot the differences, put things together, count, add, subtract, observe, color after breaking the color code, write following a pattern, learn to count to ten, and more. A perfect classroom curriculum supplement, *Learn Math And Have Fun* would also be appropriate for homebound rainy day fun as well long road trip distractions while traveling. Also very highly recommended from Teora USA is

Amazing Games: Activities For Smart Kids Ages 6-10 (1594960070 \$7.95).

This is a wonderful and useful introduction to math and mathematical reasoning for pre-schoolers. Most importantly, my three-year-old son had fun with it, and found the colorful pictures throughout the book very engaging. Counting, matching, writing numbers one through ten, learning the use of "long" and "short", simple calculations, and other concepts are covered. At the top of each page is a small tag for parents telling them what the page is trying to teach. This is also a great book for helping children learn to follow instructions. Highly recommended for parents of pre-schoolers!

This is not just a math book, but contains a lot of activities like matching, and mazes. With lots of colorful counting, adding, numerical sequence, and other math functions done in a fun and playful way this is a great book for home school or to supplement a traditional school program. Learn Math and Have Fun Activity Book for Preschoolers is recommended for parents and teachers.
