Zoologist Jim Kavanagh has made a career out of introducing novices to plants, animals, the sciences and world cultures. In addition to creating over 500 simplified nature guides, he has also authored guides to languages, cities and outdoor skills. An avid traveler and backpacker, Kavanagh's path has taken him around the world to many remote destinations including the upper , Africa, Australia, and the Arctic Circle (and this is just the As). He is also the author of a series of state-specific guides to common species and natural attractions and a children's book on evolution.

Great pocket guide for the animals of Yellowstone, and it's laminated!

Very useful pamphlet

Not as comprehensive as expected, but fine for kids.

I bought book because I hope to make a trip to Yellowstone and wanted to see what wildlife I might possibly see and be able to photograph. Great resource book.

This was super fun for the whole family to look at on our trip to Yellowstone. We saw so many different kinds of animals and were able to identify many of the unknowns with this product. It is laminated and folded so it is easy to carry in a backpack.

I bought this to identify wildlife on a upcoming trip. I have several from other places and it saves me from having to carry heavy nature books.

I bought this for a big family trip. The kids (11 of them) had a lot of fun looking up which animals we saw and which ones we would like to see. It's very durable.

Great little identification guide for the park!
