This is an excellent resource for my class in Purchasing Behavior. The exercises are beneficial to the concept behind the reasoning for why consumers shop the way that they do. All are applicable to modern society and provide excellent examples.

I really liked this textbook because it's very short, and to the point. It outlines basic concepts of consumer behavior and though some of the chapters can have a lengthy explanation, most are pretty short. I took a consumer behavior class with this book, and I think it's good for teachers, because it is so easy for students to understand without a bunch of lengthy lectures.
