Aidan Bodeo-Lomicky lives in Bethlehem, Pennsylvania and was born in 2000. He plays tennis around 15 hours a week, and aspires to get a college scholarship. He also does a lot of birding, and loves being outdoors. But perhaps his favorite thing to do is Vaquita conservation. He has been working on Vaquita conservation since 2010. He runs a blog called V-log, <http://vlogvaquita.com/>, on which you can find all of the information you need about the Vaquita, along with everything that he is working on. He has many ideas in the works, and has a lot of associates and supporters. Aidan's goal is to save the Vaquita while giving the Gulf of California fishermen a good living.

No scientific tome, but a nicely done book by a young author that cares about the subject, as should we all. I hope the Vaquita survives long enough to see Aidan fulfill his potential. I considered the purchase of this book a donation to the cause, and was rewarded with a memento to share and with which to spread the word. You can't go wrong buying this book.

I recently purchased property by the Sea of Cortez, and my entire family LOVED this book!

Excellent !!!

This is the only book of it's kind. There is no other book about the Vaquita porpoise. The author did all his own illustrations except for the cover picture. I was very impressed with his depth of knowledge about the world's most endangered marine mammal, How nice that he also gives all his profits back to the cause of saving the vaquita! If all people were as socially responsible as this young man, the world would be a better place. Please support the vaquita and buy this book!

great.....congratulations
