Customer Reviews

As always Mr Franco knows his business. I love the way he keeps it simple and concise. You can't go wrong with any his books

Great source of info, tips and strategies for self defense weapons to augment your personal protection. As a student of Krav Maga the fighting tips are very applicable and relevant. The more knowledge and training the better off you'll be in a violent encounter and this book will definitely help you.

This is a great overview of various weapons you can carry. Sammy Franco covers firearms, edged weapons, improvised weapons, flashlights, pens, fist loaders, and much more. My favorite part was the section on having a walking stick with your bug-out-bag. This is great if you have to walk long distances as well as for defending yourself. He also had chapters on situational awareness and controlling fear, and provides actual exercises you can perform to improve these.

As a martial artist of over 35+ years I know real from BS and this is real deal. I have followed

Sammy's work for years, why because I believe his is at the forefront of self protection and preservation. This book gives straightforward weapons and methods for when the SHTF, such as personal carry weapons which several I already carry and a bug out bag essentials list. These items should be in everyone's possession if they care about self preservation. Do yourself and your family a favor and get this now! Highly recommended

This is a thorough and impressive work. No fluff. No Bs. Mr Franco and CFA are the real deal. As a Kravist the principles, strategies and tactics contained in this book are consistent with the best CQC (Close Quarter Combat) techniques available. In a SHTF situation the prepared stand the best chance of surviving. I strongly recommend this book. Read it. Study it. And most importantly apply it.

Excellent list of self-defense tools for everyday carry. I know I personally carry several of these tools in my car and on my person. If you want to know THE definitive list of EDC weapons, this is the book for you.

Another good book by Mr Franco. Straight forward and to the point. Information you can trust. In a world that is becoming increasingly more dangerous it makes sense to be prepared and having weapons to hand is only a small part of the equation. Having the right weapon and knowing how to use it can be a matter of life and death. By following Mr Franco's advice from this book, you will learn those essential skills and how to choose the correct "tools" to keep yourself safe when the "brown stuff" hits the fan. This book should be in the library of everyone who takes the game of life seriously.

I have been studying Sammy Francis work for a very long time and he is always coming up with new concepts and angles. I am an hour into this book and loving it. Great job.
