USMLE Road Map Pharmacology, Second Edition (LANGE USMLE Road Maps)

Synopsis

USMLE Road Map: Pharmacology presents a concise and focused examination of the essential concepts in pharmacology. Through a streamlined and easy-to-follow hierarchical outline format, it guides students through the most important attributes of each drug class and reviews the mechanisms, actions, and side effects of each drug prototype. The outline is enhanced with an extensive and original illustration program that visually conveys the essential information and promotes retention of the material. Features such as clinical correlations and clinical problems are also included.

Book Information

Series: LANGE USMLE Road Maps

Paperback: 192 pages

Publisher: McGraw-Hill Education / Medical; 2 edition (November 10, 2005)

Language: English

ISBN-10: 0071445811

ISBN-13: 978-0071445818

Product Dimensions: 7.4 x 0.3 x 9.3 inches

Shipping Weight: 10.6 ounces (View shipping rates and policies)

Average Customer Review: 4.2 out of 5 stars 9 customer reviews

Best Sellers Rank: #468,814 in Books (See Top 100 in Books) #50 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Basic Sciences > Toxicology](#) #90 in [Books > Medical Books > Pharmacology > Toxicology](#) #174 in [Books > Medical Books > Medicine > Reference > Drug Guides](#)

Customer Reviews

Bertram G. Katzung, MD, PhD Professor Emeritus Department of Cellular and Molecular Pharmacology University of California, San Francisco San Francisco, CA

simply love it, great help for studying for step 1 simply love it, great help for studying for step 1

I am an IMG and I used this book for my studying for USMLE S1. I can tell that this book in combination with FA should be enough to deal with pharmacology questions on the exam. It was enough for me (I passed Step 1 with good score). So, I would recommend this one for IMGs, especially if you are short on time.

love it.

i like this book. it is thin enough to be able to get through quickly yet comprehensive. i used this in addition to the larger katzung/trevor book and pharm went quite well for me

You do not need this book. FA step 1 is good enough for the exam. It is not an awful book however it is needless. If you want to learn pharm very well read a textbook or a more detailed book (I would not recommend for the exam). Otherwise go with FA.

OK, this book isn't the best choice for in-depth learning of pharmacology - and you definitely shouldn't expect this from the resource which is only 178 pages long - but this isn't the main purpose of this title - it was created to be used as a RE-VIEW and it serves this purpose extremely well. For in-depth study you should get 'Katzung and Trevor's Review of Pharmacology' or 'Lippincott's Illustrated Reviews: Pharmacology'; these books are excellent, but, even though both claim to be 'reviews', who can reread their 600 pages again and again? at the same time, pharmacology tends to be forgotten in just a few weeks (even when it was learned very well in the past) and you have to refresh your memory again and again; and as your exam approaches you'll need more and more quick reviews because you'll not have enough time for the big resources; even though pharmacology is the best written subject in 'First Aid for the USMLE step 1', still it's too superficial and you should reserve that book for cramming just before the exam; so, you'll get a long gap in the middle between in-depth study and 'First Aid', which has to be filled; at this point of your preparation, you'll find that 'USMLE Road Map: Pharmacology' is very helpfull, well-written, well-illustrated and perfectly suited for quick and repetitive readings; it focuses on high yield facts, which will be heavily tested on USMLE step 1, without extraneous details, which may be important for wards or for the USMLE step 2 CK, but aren't necessary for step 1; for this reason 'Road Map' is much more useful for step 1 than 'Pharmacology for the Boards and Wards', which tries to reach everyone and, as a result, is less high yield for this exam; though this book is larger (256 pages) than 'Road Map', it contains more irrelevant information and less - relevant.

Received as described. OK . Best knives I've owned! good . a present ,

I've read already Lippincott's Illustrated review of pharmacology and others great resources and i

am convinced that USMLE Road Map Pharmacology seems the most high yield and fast review. It just goes direct what is important to know. Simple and Efficient.
