Kill Switch: Joe Ledger, Book 8

Synopsis

What do you do when the power goes off? Terrorists have acquired a terrible new weapon that can crash the power grid and plunge America into a new dark age. A coordinated attack is planned to shut out all lights and emergency services to 10 major cities. Planes will fall, hospitals will go dark, no help will come. And in that terrible darkness, a dreadful plague will be released. If the lights go off, nothing can stop the bioweapon from killing millions. At the same time, the intelligence services are being torn apart from within by a plague of betrayal, murder, and suicide. Even the Department of Military Sciences is stumbling in its response to the growing threat. Time is running out, and Joe is being hunted by a terrifying new kind of assassin. A team of remote viewers have the ability to take over any person and turn ordinary citizens into killers. Where can you turn when there's nobody left to trust? Joe Ledger faces his deadliest challenge as friends and allies become enemies and all of the lights begin to go out...

Maberry brings the weird and unbelievable to life again. Like all of his other Joe Ledger books, he makes the things of fantasy and nightmares into a twisted reality that gets you believing they could actually be true. Kill Switch just sucks you into its tentacles immediately and doesn't let you up for air until the very end. The way things are described and the pace of the book are stunning and will evoke your imagination and bring every detail to life. It doesn't hurt either that the things Joe and his team say will have you laughing out loud and causing your family or co-workers to give you an odd

look. Joe is seriously hilarious with his quips. I have a serious man crush on Joe, he is my hero. Yes, I am fully aware that I sound like a moron. No, more like a Trekkie who suddenly found himself in an elevator with Captain Kirk. I don't actually have many hero's, but when I go bromance I go full bromance.... ;-)

This is a must read for any Sci-Fi fan and will have you rethinking what you think you know about science fiction. So with that, I will leave you with this

The series is just that good, not 5 minutes after I finish the year's new book in the series that I'm already starting to anticipate/wait for the next years installment. This year's book keeps you glued for to the pages for sheer curiosity of what's to come, keeps you guessing about what exactly is going on, and keeps you wondering who the bad guy really is. If I had one complaint about last year's installment, Predator One, it's that I knew who the "villian" was very early on. I had known early in Code Zero, but loved the way it was done so it can either work for or against the book. This years wasn't one of those where you know early, it wasn't till around 60% of the way through that I had a strong idea, and not knowing the exact "Why" was a big reason I wanted to finish the book all the faster. Kill Switch brings back many of the fan favorite characters from the previous books, and introduces you to some new, intriguing personalities. If nothing else, Maberry is great at introducing you to a character and making them all feel genuine and unique. Love the little "easter eggs" for some of his other works mixed into the book here and there, I spotted them and instantly thought "Ohh I know what he's referencing here" cause I've read a large portion of Maberry's library. If you love the Joe Ledger series and action packed books that will keep you guessing at every turn, then you'll love this book. I'd recommend picking it up at a time where you have a lot of free time to spend reading, because if you're anything like me, that's all you're going to want to do.

Another great Joe Ledger read. Spoiler Alert. This one starts with Joe, Bunny and Top headed for Antarctica. Mission?? A handoff from the CIA. A handoff from Harcourt Bolton. A Bolton who's a living legend in the spy world. A man Joe has some hero worship for. A man he has a loads of respect for. A Bolton no one really knows at all. The mission was in two layers. The cover is a surprise inspection to evaluate the status of a research base designated Gateway. This is a repurposed facility. The original Gateway was an old radar station from the early cold war era. Satellites made it mostly obsolete so it was closed up. Operative word is was. The base was built at the foot of Vinson Massif, the tallest mountain in Antarctica. The Russians and Chinese both have research stations in the same region. From intelligence received in the last twenty-eight hours the

Russian and Chinese bases have gone dark. No radio, no communication of any kind. Nineteen hours ago our facility also went dark. Joe and his team are about six hours ahead of the Russian and Chinese teams thanks to Bolton getting wind of the investigative teams headed out. Bolton was busy with something else so he passed it off the Church and the DMS. Hence Joe, Bunny and Top headed for Antarctica. Gateway isn't a radar outpost anymore and hasn't been for over a decade. but that's where things get muddy. Bug the computer geek for DMS had trouble finding out who actually opened it and what they are doing. Bug found out its some kind of black budget thing, but he only found that because of how well the details had been hidden. Very little of it is in any of the databases Bug and his geek squad had infiltrated. The place is now a mystery and Joe Ledger and his Echo teammates are going to find out what's what. Its a mission which will almost cost Joe, Bunny and Top their lives. So begins another damned fine read by Mayberry. This one has Joe, Bunny, Top, Church, Bolton, Violin, Harry Bolt, Junie, Ghost, Prosper Bell, his father Nathan, Lydia, Sam, Joe and his team who come down with the Spanish flue after their trip to Antarctica, a sickness from the past, a bunker system underground, the God Machine, mind control, a Joe, Top and Bunny who begin to think they are losing their minds, a Bolton who is appointed as co director of DMS, a DMS who used to be number one for reliability, a DMS that lately has been less than stellar in performance, a Bolton with his own agenda, a Church who's got an idea about what's going on, the Unlearned Truths, Violin and Harry making it out with one of those books, a Prosper who's the key, the POTUS and his hatred of Church and the DMS, a POTUS who will appoint Bolton as its director and cancel the charter, a Church and Lilith who save the day, a Joe looking for his inside Killer, a Ghost who senses something is wrong, murder, attempted murder, an egomaniac who wants the world to worship and adore him and Joe Ledger doing his best to figure it all out, hang onto his sanity and stay alive. Five Stars
