# Laboratory Notebook

## Synopsis

Freeman's hugely popular laboratory notebook of carbonless grid paper (3-hole punched and perforated) has been enhanced to serve as a quick chemistry reference as well. An extended back cover flap provides:

- The Periodic Table of Elements
- A list of Good Laboratory Practices
- Tables of Common Derived Units
- Common Conversion factors
- Fundamental Physical and Mathematical Constants

## Customer Reviews

I liked using this notebook for organic chemistry labs. It gets the job done and isn't expensive. It has specified perforated tear-out pages that you can tear out to turn in and keeps the carbon copy that's not perforated in the book as your copy for reference. I like that it doesn't have a spiral because those get caught and tangled in backpacks and book-bags.

good condition

The yellow copy sheets throughout the whole book were damaged (a 4 inch wide, thick dark streak across the entire left side) so much so that anything I write on that side of the white sheets is not visible on the yellow sheets. Have only ordered one of these through, so perhaps it's an uncommon

problem. The other reviewers were obviously pleased with the notebook they received, so if it costs more at your bookstore it still may be worth getting it from (just allow enough time to return it if it's damaged).

needed it for class

It depends what grade I get in the lab, but I'm rating 5 stars because the yellow papers look very cool behind it. I look like a lawyer + accountant when I write.

very helpful tool

Just as described. Shipped really fast. Well bounded so its very durable. Used it for my Organic Chemistry lab and it worked out perfectly. I would recommend for the price to any student.

Works for what you need it for.
