Customer Reviews

I can't recommend this book highly enough: It was incredibly helpful from the beginning to end of the MBA search process. It really does help you craft a strategy, construct resumes and essays, and prepare for interviews. The best part is the small section on the individual schools: these provide a great introduction during your search and are a great starting point when beginning applications. I'm off to my first choice MBA program in a few months and I think this book is a big part of the reason why.

I'm an admissions consultant and I found this book very helpful.

The authors do a great job of considering a variety of angles and scenarios for the application process. Definitely the cheapest step I'll take while applying to business school, and well worth the investment.

This was useful in prepping for applying to b-school, in that it gave good insight into what admissions officers look for as well as how to develop a strategy that would put you ahead of the competition.

It's hard to get mba books because you know you'll only need them for a little while, and then each program is so different it's difficult to judge what you really need. This book was great in that it offered info from particular schools to which I was applying. If I had to choose only one book, it would be this one.

Great essay examples--great buy!

It is a good book, but not my personal favorite. For more insightful advice I warmly endorse Avi Gordon's book.

Only reached chapter 3 and already this book has helped me figure out a better plan for working on things to improve my application (not just what, but how). This book also includes valuable information for those who are just starting the process and still cannot pinpoint schools to apply to.

Def a good read for those just starting out IMO.
