Applications Of Space-Time Adaptive Processing (Iee Radar, Sonar, Navigation And Avionics)

IEE Radar Series 14

Applications of Space-Time Adaptive Processing

Edited by Richard Klemm

Synopsis

This book provides a unique overview of the broad field of space-time processing and is divided into two parts: the first dealing with the classical adaptive suppression of airbourne and spacebased radar clutter, and the second comprimising miscellanous applications in other fields such as communications, underwater sounds and seismics.

Book Information

Series: Iee Radar, Sonar, Navigation and Avionics

Hardcover: 956 pages

Publisher: The Institution of Engineering and Technology (September 1, 2004)

Language: English

ISBN-10: 0852969244

ISBN-13: 978-1402077869

Product Dimensions: 2.5 x 6.2 x 9.2 inches

Shipping Weight: 3.4 pounds (View shipping rates and policies)

Customer Reviews

Richard Klemm has recently retired after a distinguished career at FGAN FHR (now Fraunhofer FHR), a research institute working in the areas defence and security, and decades of service to the radar community. In his spare time Richard Klemm is a passionate classical pianist.
